

Memo from
JOSHUA LEDERBERG

To: Dr. June Goodfield
Rockefeller University

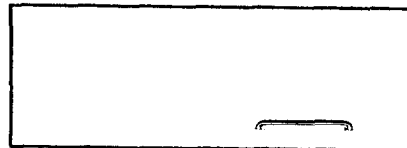

re: Science in Boston NOV 10 1977

I was very much interested in the your
remarks in the current issue of science;
perhaps we might have a chance to
discuss them at closer hand, if you do it
suit my colling on you the next time I
am in N.Y. Einstein (like Arrhenius)
display a substantial role in shaping my
own perceptions of the scientific career
when I was a child; and I have been
interested how general this may be.

Meanwhile, I know you would want
to be in touch with Harriet Zuckerman at
Columbia (Sociology) who has some reputation
of biography/historical studies.

Sincerely,

NOV 10 1977

Joshua Lederberg
